

NONCE

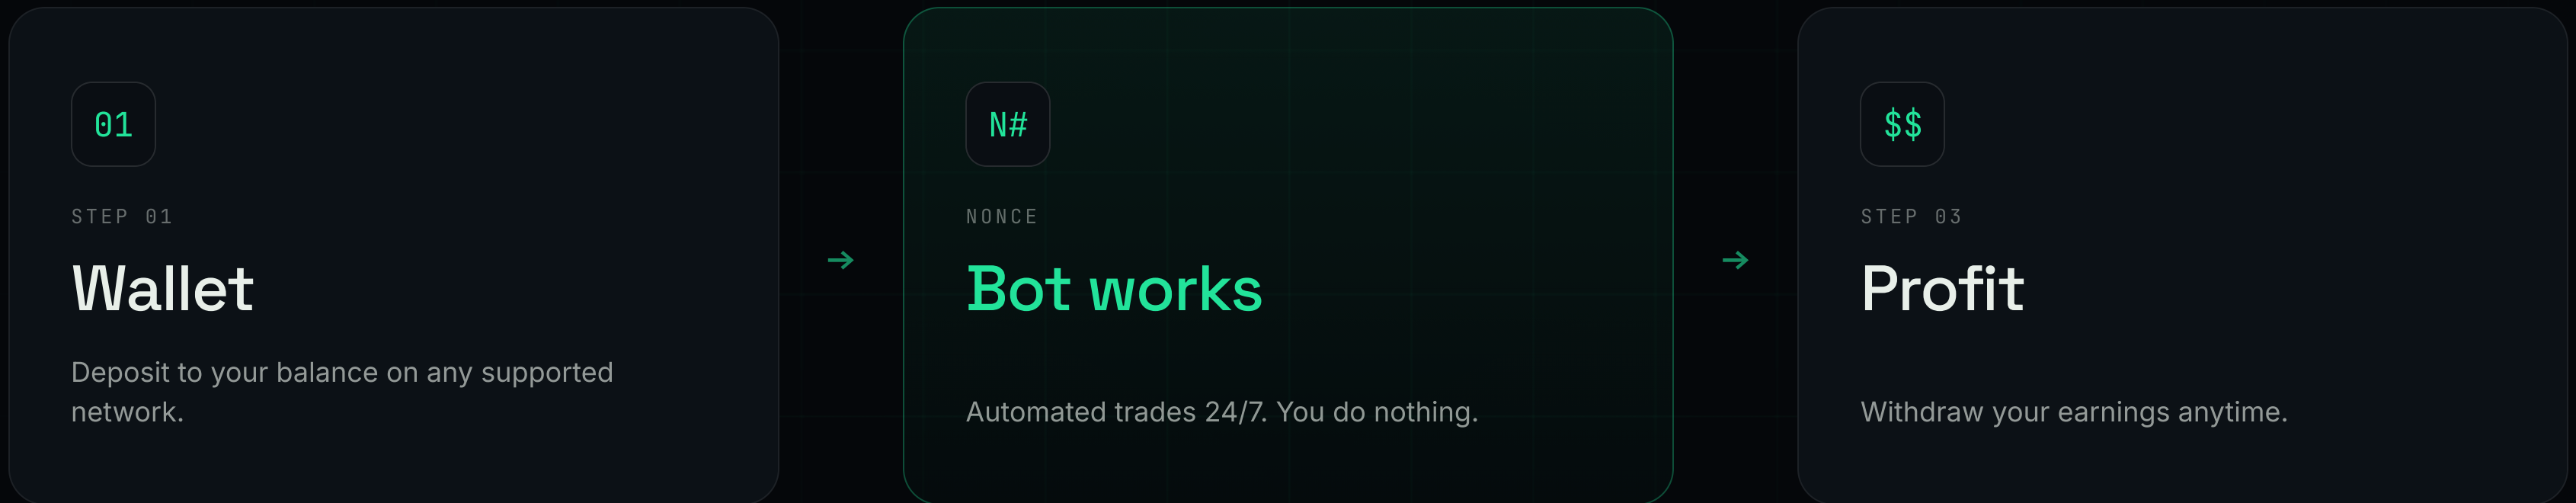

Automated crypto service
that works for you

PRODUCT

A bot that **trades** for you.

You deposit. The bot works around the clock. Profit is credited without your input — no trading experience needed.

— CONTEXT

Your crypto just sits there?

01 · STAKING

5% APY is barely anything

Classic staking pays the bare minimum, barely outpacing inflation.

5% APY

02 · TRADING

Hard, slow and stressful

DIY trading demands experience, discipline and nerves. Mistakes cost money.

24/7 ATTENTION

03 · USDT

Stablecoins lose to inflation

USDT earns nothing. Just sits in your wallet.

0% YIELD

Nonce turns idle crypto into **daily income.**

— PIPELINE

Three steps to your first profit.

— SAFETY & TRUST

Why you can trust it.

• 01 ON-CHAIN

Public blockchains

All operations are visible in the app and independently verifiable on any block explorer.

• 02 WITHDRAWAL

Within 24h — not weeks

No weeks-long freeze periods like scam projects use. Active positions close within a day.

• 03 ENTRY

Try it with \$30

Minimal entry risk. Join with \$30 and see how everything works live.

• 04 PRIVACY

Transaction mixing

Your deposits and withdrawals aren't publicly traceable — the link between addresses is broken.

• 05 PRICING

Transparent fees

Profit only, no hidden charges. No deposit or withdrawal fees.

• 06 RESULTS

Pool is steadily profitable

Occasional losing trades are offset by successful ones. The strategy wins in aggregate.

HONEST ABOUT RISK

This is real trading of new tokens with automated execution — market risk exists and some trades lose money. Overall the pool is consistently profitable: individual losses are offset by successful operations.

— FREQUENT QUESTIONS

FAQ

The most common questions — short and to the point.

? Is this a scam?

Nonce runs on **4 public blockchains**, every trade is visible in real time, withdrawals take 24 hours. Join with **\$30** and see for yourself.

? How much will I actually earn?

With **\$1,000 in the pool** — around **\$22 per day, ~\$670 per month** net. On \$30 — about 40 cents a day.

? Do I need a crypto wallet?

No. Sign up by email or via Telegram — the platform creates wallets for you. Your own wallet (MetaMask, Trust, Phantom, TON) also works, but isn't required.

? What's the minimum?

In Instant mode — **from \$1** (funds return with profit right away). In the pool — **from \$30** USDT.

? What if the bot loses?

It's real trading — individual trades can lose money, but the pool is profitable overall. No "risk-free" promises, but the statistics are consistently positive.
